

The screenshot shows the Jenkins web interface at the URL `54.147.170.90:8080/manage/computer/`. The main heading is "Nodes". On the left sidebar, there are links for "Nodes", "Clouds", "Node Monitoring", "Build Queue", and "Build Executor Status". The "Build Queue" section shows "No builds in the queue." The "Build Executor Status" section shows a list of executors for each node:

- Built-in Node:** 1 Idle
- prod:** 2 Idle
- TEST:** 1 Idle

The main table lists the nodes with their details:

S	Name	Architecture	Clock Difference	Free Disk Space	Free Swap Space	Free Temp Space	Response Time
	Built-In Node	Linux (amd64)	In sync	4.75 GB	0 B	4.75 GB	0ms
	prod	Linux (amd64)	In sync	5.31 GB	0 B	5.31 GB	69ms
	TEST	Linux (amd64)	In sync	5.31 GB	0 B	5.31 GB	32ms
Data obtained		15 min	15 min	15 min	15 min	15 min	15 min

Below the table, there is a link to view the "TEST" agent's status.

The second screenshot shows the Jenkins "Agent TEST" configuration page. The URL is `54.147.170.90:8080/manage/computer/TEST/`. The page title is "Agent TEST". There is a button to "Mark this node temporarily offline". Under "Projects tied to TEST", it says "None". On the left sidebar, there are links for "Status", "Delete Agent", "Configure", "Build History", "Load Statistics", "Script Console", "Log", "System Information", and "Disconnect". At the bottom, the "Build Executor Status" section shows "1 Idle".

Dashboard > Nodes > TEST > Configure

Usage ?
Use this node as much as possible

Launch method ?
Launch agents via SSH

Host ?
172.31.30.156

Build Triggers

Build Environment

☐ Trigger builds remotely (e.g., from scripts) ?

☐ Build after other projects are built ?

☐ Build periodically ?

☒ GitHub hook trigger for GITScm polling ?

☐ Poll SCM ?

☐ Delete workspace before build starts

☐ Use secret text(s) or file(s) ?

☐ Add timestamps to the Console Output

☐ Inspect build log for published build scans

☐ Terminate a build if it's stuck

☐ With Ant ?
